Basic Statistics:

Sample and Sampling:

- * These analysis are fully based on the your sample.
- * The method of analysing sample data are called method of descriptive statistics.
- * If we employ sample data draw inference about a population.
- * We are using method of inferential statistics.
- * We use computed sample statistics to draw inferences about the corresponding population parameters.
- * We devices alternative sample & random sampling are:
 - (i) Random multistage clustering.
 - (ii) Stages cluster sampling.

Salesforce:

- * The fourth industrial revolution is creating a new ways for people to interact with world around them.
- * Successful companies meet raising customer expectation with relevant interaction.
- * Salesforce Applications and the customer 360 platform.
- * In 1999 Salesforce became a Trailblazer by popularizing software.
- * Along with innovative underlying services, the customer 360 platform also provides developer tools that allow you to customize feature and user interfaces.
- * Like all salesforce the customer 360 platform was created with trust as the number one priority.
