Repot :
→ Probability and Randomness.
* 3.01 Randomness.
* 3.02 Probability.

→ Sample space, events & the diagrams.
* Sample space, event, probability.
* Quantifying probabilities.

→ Probability & sets:

* Basic set - theoretic concepts.
* Practice with sets.
* Union.

→ Conditional probability & Independence
* Joint & Marginal probabilities.
* conditional probabilities.
* Independence b/w random variables.
* Non - conditional probability.
* Probability.
* R-Lab - Ʊ probability.

- **Salesforce:**

  → Build a battle station app.
  → Create a battle station app.

- **Introduction:**

  → Create the battle station construction app.
  → Navigate to setup.
  → Create the battle station object.
  → Tour the app
  → Build the objects model.

- **Overview the objects model.**

  → Battle station custom objects.
  → Resource custom objects.
  → Supplies custom objects.
  → Modify the user experience.
  → Modify the battle station page layout.

  → Add some battle station data.
  → Add a Roll up summary field.
  → Create reports and dashboard.
  → Add business logic.
  → Add a utilisation validation rule.
  → Automate with the lighting process builder.
  → Update Record action.
